Research Work

Objective

Research Work

Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

Research Work

Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

As it is an early stage of the subject, you must do a research work to select the concept and then get more information about it.

Research Work

Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

Steps:

Research Work

Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

Steps:

To look for a concept, process, document, etc.

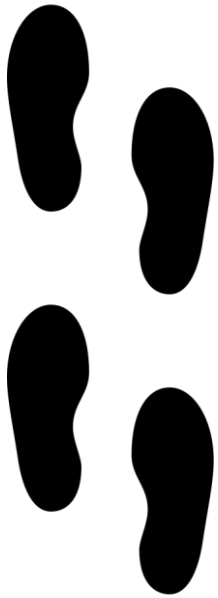
Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

Steps:



To look for a concept, process, document, etc.

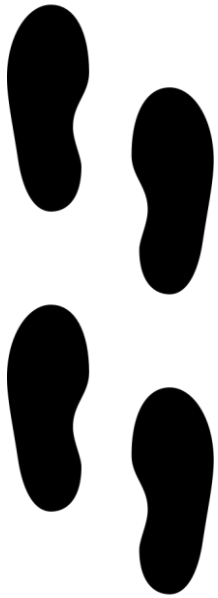
To gather information about your selection.

Research Work

Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

Steps:



To look for a concept, process, document, etc.

To gather information about your selection.

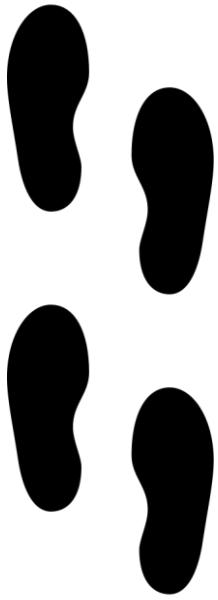
To create a document explaining your research.

Research Work

Objective

The objective is **to investigate software quality**. Specifically, the idea is to investigative something related to software quality.

Steps:



- To look for a concept, process, document, etc.
- To gather information about your selection.
- To create a document explaining your research.
- To submit your work.

Research Work

Submission

- **To submit a PDF with the work of the task you have selected.**
- **The document should be appropriate: cover, table of contents, sections, figures, references, etc.**
- **7 / 15 pages (without cover and index).**
